

CCTV Policy

CCTV Policy

- Whilst not an essential element in the scheme, it is considered best practice for all premises to have an operational CCTV system in use.
- It is preferable for the system to be in real time and on hard drive with the availability to copy disks for other agencies such as the police.
- There should be a trained member of staff able to operate the system on duty at all times that the venue is open.
- If there are designated routes for ejecting customers, these should be covered by cameras.
- Licensees should ensure that CCTV systems are fully operational at all times.
