

General Safety Policy

General Safety Policy

- All premises should have a written accident reporting system that complies with health and safety regulations.
- The building should be in good condition and a policy should be in place to deal with drink and other liquid spillages.
- A policy should be in place to effectively manage Smokefree legislation or customers using any other external facility.
- Consideration should be given to effective management, risk assessment and recording of events that differ from normal day-to-day trading.
